What did the prehistoric animal realm look like after the dinosaurs died out? How did the terror birds catch their prey? This book explores prehistoric animals with lots of movable flaps and large, naturalistic spreads with detailed pictures.

ABOUT THE SERIES

The WWW series stands out for its playful, enticing way of conveying just the information that kids want to know. Centered on who-what-how questions, the titles in the series explore subjects of great interest to young children. The thousands of questions children ask daily are answered by means of interactive elements, engaging illustrations, and age-appropriate texts. Because the lively illustrations convey so much, the books hold children's interest even without an adult to read the clear, friendly texts. WWW is ideally suited for preschool and kindergarten ages, for children 4 to 7 years old.

CONTENT

What did the prehistoric animal realm look like after the dinosaurs died out? How did animals continue to develop after that? This book takes children on a journey into prehistoric times. In addition to the familiar mammoth and saber-toothed cat, lesser-known creatures such as gigantic sloths, the land-bound terror birds, prehistoric whales and giant sharks are introduced.

Children will learn how mammals managed to gradually assert themselves as the new masters of our planet: although their first ancestors were as tiny as shrews, over the course of millions of years they produced enormous creatures that were increasingly successful in their adaptations. The subjects of whether Yeti, King Kong and Nessie actually existed and which animals still alive resemble their prehistoric ancestors are also pursued.
